Delete.php

The screenshot shows a code editor with the following PHP code in `delete.php`:

```

1 <?php
2 include "koneksi.php";
3 $id = $_GET['id'];
4 //hapus delete
5 $query = mysqli_query($koneksi, "delete from daftar_tamu where id='$id'");
6
7
8 <script>
9   alert("Hapus Data Berhasil");
10  document.location = "index.php";
11 </script>

```

Below the code editor, a browser window is shown with the URL `localhost/buku_tamu/delete.php?id=6`. A confirmation dialog box appears with the text "localhost says" and "Hapus Data Berhasil", with an "OK" button.

Below the browser window, another browser window is shown with the URL `localhost/buku_tamu/index.php`.

DAFTAR TAMU

| 2 | bambang | bambang@gmail.com | permrograman web | semangatt!!!! | 2025-06-21 17:32:03 | EDIT DELETE |

The image shows a web development environment with a code editor. On the left is a file explorer showing a project named 'BUKU TAMU' with files: 'delete.php', 'edit_action.php', 'edit.php', 'index.php', 'koneksi.php', 'tambah_action.php', and 'tambah.php'. The 'index.php' file is selected and its code is displayed in the main editor. The code is a PHP script that connects to a MySQL database, defines a table 'daftar_tamu' with columns for name, email, address, phone, message, and date, and then displays a list of records from this table. Each record has an 'EDIT' link and a 'DELETE' link. The top of the editor has a toolbar with icons for file operations and a search bar. The bottom status bar shows the current file is 'Ln 37, Col 9', the encoding is 'UTF-8', and the file type is 'PHP'. The system tray at the very bottom shows the date and time as '29°C Berawan' and '18:06'.
